"How to navigate as an American in a world of tax transparency"

FATCA came into effect in July 2014 requiring foreign financial institutions to report US account holders' year-end balances, income and capital gains directly to the IRS or via their domestic tax authority. Failing to comply with US tax obligations may have serious consequences such as double taxation, penalties and criminal prosecution. In 2017 there are still programs available enabling Americans abroad to voluntarily comply with their US tax filing and reporting obligations, minimizing their risks of having to pay tax and penalties.

PRESENTATION (MAJATTORNEY and US Tax & Financial Services)

US Taxation: Who is affected? Individuals? Businesses? What are the risks and how do you minimize them?

FATCA: Who is affected? What are the risks and how do you minimize them?

PANEL DISCUSSION (Moderated by the American Chamber of Commerce in Sweden)

Listen to a panel discussion, with representatives from the US Embassy, financial industry and corporate leaders exposed to the challenges of US citizenship/ownership, share their real life experiences of US tax filing and reporting requirements and the implementation and compliance of FATCA.
